

Relationships and sexuality (RSE) ideas from rangatahi/young people

Research informing the creation of Te Puāwaitanga: Beyond the Birds and Bees involved written responses to questions and focus groups. The following tables were generated in response to the written question, “What content do you think young people would want in an online platform focused on relationships and sexuality education?” The anonymous written responses were generated from 81 young people across six secondary schools (ranging from Decile 1-10). All participants were aged 13-18 years. Participants wrote down their responses and placed them in a response box. The research team collated the responses and generated six themes. Each theme contains the actual written words of rangatahi with only spelling errors or sentence structures minimally adjusted for ease of reading. The responses do not represent the exact number of times different participants mentioned identical statements.

The purpose of the tables is to provide an overview of young people’s initial thoughts about RSE and an impetus for further discussion. Further research findings generated from the focus groups will be available in the future.

Six key themes were generated:

1. *Relationships and Dating Advice*
2. *Sexual Activity and Intimacy*
3. *Sexual Identity*
4. *Gender*
5. *Communication*
6. *Changing Bodies and Sexual Health*

We ask that anyone using these tables provides us with examples of use in practice, and any feedback.
